Objectives

Upon completion of this seminar, the attendee will:

- Perform basic to intermediate interpretation of 12 lead ECG's
- Identify ST segment elevation and depression consistent with MI and ischemia
- Identify signs of early repolarization from ST segment elevation
- Identify wave forms indicating electrolyte imbalance, digitalis effect, WPW syndrome, and hypertrophy
- Distinguish between a ventricular rhythm and a supraventricular rhythm which is aberrantly conducted by identifying the mean electrical axis and other clinical indicators
- Review coronary circulation
- Discuss treatment modalities for acute coronary syndromes
- Develop a systematic approach to interpreting ECG's and developing a differential diagnosis

Locations

Courses will be offered soon at a location near you. For the most up-to-date schedule, please see our website at:

www.advancedcaretraining.com

Price

Course registration fee is **\$159**

For large group discounts, please contact our office

Cancellation Policy: If you cancel at least 48 hours prior to the seminar date, you may request a refund of the full registration fee less a cancellation fee of \$30. You may also request to be transferred to another seminar date. No refunds or transfers will be honored with less than 48 hours notice.

Speaker

Shawn M. Lynch, BS, NREMT, CCRP has been an EMS care provider for 20 years, with 13 years of advanced life support critical care experience. Today, he is a firefighter paramedic with the Metro Washington Airport Authority and provides health care instruction for numerous health care facilities.

Schedule

7:30 AM: Check in/Continental Breakfast

8:00 AM: Seminar begins

10:15 AM: 15 minute break

12:00 PM: Lunch on your own

1:00 PM: Seminar resumes

2:15 PM: 15 minutes break

4:00 PM: End of seminar

Content

- Minding your P's and Q's (Anatomy of an ECG)
- The Roadmap of Coronary Circulation
- Ischemia, Infarct, and Injury—Acute Coronary Syndrome
- Bundle Branch Blocks & Hemiblocks
- Electrical Axis
- Ectopy vs. Aberrancy (SVT or V-Tach)
- Fine Tuning (Digitalis Effect, WPW, Electrolyte Imbalances)
- Hypertrophy
- Rapid ECG Screening for Pathology
- Acquiring a Good ECG (Painting the Picture)
